

WHAT IS CLAIMED IS:

1. In a shopping bag which is detachably fixed to a cart adapted to carry a certain item in a shop, a chopping bag, comprising:

a handle frame which includes:

5 more than at least two fixing frames provided at each one side of both handle frames of a shopping bag for fixing the shopping bag to the cart;

a coin storing port adapted to store coins for using the cart; and

a handle,

a Velcro tape attached to an upper side of the shopping bag for
10 selectively closing and opening an entrance of the shopping bag; and

an outer pocket adapted to store the items bought.

2. A shopping bag of claim 1, wherein an engaging protrusion is provided in each one side of both the handle frames of the shopping, and an engaging
15 groove is formed in the other side of the same to which said engaging protrusion is engaged for thereby engaging the entrance of the shopping bag.

3. A shopping bag of claim 1, wherein a synthetic rubber material is provided in the interior of the fixing frame for preventing the shopping from
20 being moved when the shopping bag is fixed to the cart.

4. A shopping bag of claim 1, wherein said handle frame of the shopping bag is formed of a plastic or metallic material.
5. A shopping bag of claim 1, wherein a bottom portion of the outer pocket
5 of the shopping bag is formed of a solid material for thereby expanding a storing space for storing a certain amount of items therein.
6. A shopping bag of claim 1, wherein one or two strings which are suspended on a user's shoulder are provided in the shopping bag for thereby
10 implementing an easier carry when transferring the items.
7. A shopping bag of claim 1, wherein a Velcro tape or snapper is provided in a lower portion of the outer pocket so that the shopping is foldable for decreasing a volume of the shopping bag when storing or carrying the shopping
15 bag after the shopping is finished.
8. A shopping bag of claim 1, wherein a plurality of sub-pockets are provided in the interior of the outer pocket of the shopping bag for thereby separately storing different items by the kinds of the items.
- 20 9. A shopping bag of claim 1, wherein an elastic rubber band is provided in an edge of an entrance of the shopping bag for thereby elastically extending

and contracting the entrance of the shopping bag.

10. A shopping bag of claim 9, wherein an elastic rubber cord is inserted into an edge of the entrance of the shopping bag.
